(B)

(C)

(D)

(E)

(F)

FYI What world record was made using an 11.8" squeegee and 2.4 gallons of water? The World's Fastest Window Cleaner. Terry Burrows of Great Britain was awarded this honor for his performance at the National Exhibition Centre in March of 2005. Burrows cleaned three standard 45" x 45" windows, including wiping the window sills, in just 9.24 seconds! The contest regulates a maximum squeegee size of 12" and time penalties are deducted for any water marks left on the glass.

Unger

A Sanitary Standard Squeegees

For use in areas where hygiene is a top priority. Ideal for hospitals, kitchens, bathrooms, dairies, around swimming pools or wherever metal components are undesirable. Acid-resistant polypropylene construction. Reinforced frame. (Aluminum handle UNG AL14A sold separately.)

For stationary, indoor, mist to fog spraying. Applies a wide variety of chemicals, even wettable powders. Won't damage chemical composition. 110-volt electric motor. On/off switch. Output nozzle adjusts from 1.5 to 5.3 gph. Translucent, high-density polyethylene canister; carrying handle. Two-gallon capacity.
RLF 1952B

Each 250.92

B 64-oz. Sprayer/Mister

Small, handheld pressurized sprayer/mister with adjustable poly nozzle. Ideal for houseplants and light-duty spraying. Polyethylene with buna seals.
RLF 1998TL

Each 12.40

C 64-oz. Hand Sprayer

Compact version of standard pressurized sprayer. Adjustable poly nozzle. For use with fertilizers, insecticides and weed killers. Polyethylene with Viton® seals for chemical resistance.
RLF 1985LG

Each 34.34

INDUSTRIAL TANK SPRAYERS

Industrial-type liquid sprayers with multiple applications: masonry, pest control, carpet cleaning, waterproofing, degreasing. Use with herbicides, insecticides, stain removers, cleaning agents, other chemicals. Not for spray painting.

D Standard Sprayers

- Funnel-top sprayers with buna seals
- All-polyethylene flow control and discharge

White translucent polyethylene tank equipped with poly pump handle, reinforced hose and buna seals. Includes polyethylene extension wand with a poly flat-fan nozzle.

No.	Capacity	Each
RLF 1973	3-Gallon	41.44
RLF 1972	2-Gallon	38.26
RLF 1971	1-Gallon	35.48

E Commercial-Grade Sprayer

- Funnel-top sprayers with Viton® seals
- Brass flow control and extension

White translucent polyethylene tank equipped with poly pump handle, pressure relief valve, commercial grade hose, brass discharge system and Viton® seals for maximum chemical resistance. Tank includes brass extension wand with flat-fan nozzle, and carry strap. 3-gallon capacity.
RLF 1963VI

Each 68.04

F Acid-Resistant Sprayer

- Straight-neck sprayer with Viton® seals
- All-polyethylene flow control and discharge
- Can be used for spraying acids

Orange translucent polyethylene tank equipped with poly pump handle, reinforced hose and Viton® seals for maximum chemical and acid resistance. Includes polyethylene extension wand with an adjustable nozzle. 2-gallon capacity.
RLF 1992A

Each 44.40

G Polyethylene Discharge Kit

Includes extension wand and adjustable nozzle. Use for Tank Sprayers RLF 1973, RLF 1972, RLF 1971 and RLF 1992A (sold separately).
RLF 1913PB

Each 16.62

H Brass Discharge Kit

Includes extension wand and flat-fan nozzle. For Tank Sprayer RLF 1963VI (sold separately).
RLF 1910BV

Each 28.12

I Soft Goods Kit

Replacement parts for Tank Sprayers RLF 1973, RLF 1972, RLF 1971, RLF 1992A and RLF 1963VI (sold separately).
RLF 1910SGV

Each 11.27

NEW

For use with Ready-to-Dispense (RTD®) maintenance-free dilution control systems.

A RTD® Water Hook-Up Kit

Designed to connect Super Concentrate RTD® formulas (sold separately) with any standard water supply hose. For use with Render™ III Disinfectant Cleaner DRK 3174575 (sold on pg. 15), Fantastik® All-Purpose Cleaner DRK 3481057 (sold on pg. 21), Mr. Muscle® Kitchen & Floor Cleaner DRK 3719598 (sold on pg. 25), Final Step™ 512 Sanitizer DRK 3063550 (sold on pg. 25), ElimineX® Foaming Drain Cleaner DRK 4266308 (sold on pg. 29), Scrubbing Bubbles® Bathroom Cleaner DRK 3719563 (sold on pg. 30), ALL-IN-ONE H₂O₂ Cleaner DRK 3737681 (sold on pg. 30), Windex® Glass Cleaner with Ammonia-D® DRK 3481049 (sold on pg. 36) and JANITOR IN A DRUM® General-Purpose Floor Cleaner DRK 3719601 (sold on pg. 46). Kit includes instructions, 5-ft. supply hose, female quick-connect with auto stop, male quick-connect and Y-valve. 12 kits per case. DRK 4129080

Case 32.78

Unisan

B Metal Pump

Self-priming, chrome-plated pump. Resists chemical action of noncorrosive liquids. Pumps 22 ounces per stroke. For 15-, 30- and 55-gallon drums with 2" openings.

UNS 422

Each 60.78

C Siphon Drum Pump

Made from polyethylene for 15-, 30- and 55-gallon drums. Red.

UNS 423

Each 17.72

D Plastic Drum Pump with Pail Adapter

Fits both ¾" and 2" openings. Includes one pail adapter that snaps onto 5-gallon pails. Pumps 8 ounces per stroke. Pump fits 15-, 30- and 55-gallon drums.

UNS 428

Each 18.88

E Econo Dispensing Pump

Pumps one ounce per stroke. Cap (38mm) with 10¼" tube length. Ideal for oils and solvents. Fits standard gallon bottles.

UNS 417

Each 4.20

"Green cleaning" refers to the use of products and procedures that are more healthful and more environmentally friendly than others serving the same function. The Environmental Standard for Cleaning Services (GS-42) is Green Seal's current standard that specifies green chemicals, supplies and equipment as well as cleaning procedures and mandates employee training and communication with building owners and occupants.

GREEN CLEANING PROCESSES

- Carefully plan and time the chemical cleaning process. Keep a schedule of events and plan to disinfect high-traffic areas and entrances more frequently than those areas where access is limited.
- Identify occupants with special needs and implement a plan sensitive to those needs. For instance, if there are allergies to the chemicals used in cleaning, or any other allergies, be sure to design the cleaning process to avoid exposing occupants. In order to identify effectively, get the word out and invite anyone with concerns to notify the staff of their specific needs.
- Reduce chemical waste by using dilution methods as instructed by the manufacturer, tracking quantities of chemicals used and using appropriate dispensing technology to limit overuse of chemicals.
- Improve indoor air quality by maintaining sufficient outdoor ventilation. Ventilate properly when chemicals are being used in cleaning. Design a ventilation system where airflow is properly reaching the interior of the building.
- Chemicals aren't the only things releasing VOCs. Certain cleaning equipment releases harmful emissions. To reduce the impact of these effects, properly maintain your equipment and/or replace with VOC Compliant ones.

FYI

- Disinfection should be limited to surfaces where pathogens collect, such as door handles, bathrooms and other high-traffic surfaces where there is much hand contact.

■ NSF/USDA Classifications

The classifications listed below were formerly approved by the United States Department of Agriculture (USDA) which regulates meat and poultry establishments; these classifications are now issued by the National Sanitation Foundation (NSF), follow the same guidelines and have the same classification codes as the USDA. Products authorized by the NSF/USDA for use in plants operating under the federal meat and poultry program are classified according to where or how they may be used. The following summarizes brief definitions of NSF/USDA classifications that are associated with products in this catalog.

Employees who handle edible products may use compounds only when leaving the plant.

- A1** For use as general cleaning agents on all surfaces, or for use with steam or mechanical cleaning devices in all departments.
- A4** Floor and wall cleaners for all departments.
- A6** Scouring cleaners.

- A7** Metal cleaners and polishers for nonfood contact surfaces.
- A8** Degreasers or carbon removers for food cooking or smoking equipment, utensils or other associated surfaces. No food contact.
- B1** For laundering fabrics that come into contact with meat or poultry products, directly or indirectly.
- C1** For use on all surfaces in processing areas for inedible products, nonprocessing areas and/or exterior areas.
- C2** Compounds for use in toilets and/or dressing areas.
- D1** Antimicrobial agents, always requiring a rinse.
- D2** Sanitizers for all surfaces, not always requiring a rinse.
- E2** Hand washing and sanitizing compounds.
- E4** Hand creams, lotions and cleaners. Use is limited to toilet and dressing rooms.
- F1** Nonresidual pesticides. For use in all departments.
- F2** Residual pesticides. For use in inedible product areas only.
- G7** Compounds for treating boilers, steam lines and/or cooling systems where neither treated water nor the steam produced may contact edible products. This does not include compounds added to water used to cook and cool containers of meat and poultry products.
- H1** Lubricants with incidental food contact.
- H2** Lubricant, release agent, or antirust film on equipment and machine parts in locations in which there is no possibility of the lubricant or lubricated part contacting edible products.
- K1** Cleaning and/or degreasing solvents for use in nonprocessing areas.
- K2** Solvents for cleaning electronic instruments.
- L1** Compounds for use in sewage and/or drain lines.
- L2** Enzymatic compounds for use in sewage and/or drain lines.
- P1** Miscellaneous. See individual letter for specific authorized uses.

■ Dilution Chart

Use this chart as a guideline for diluting the products sold in this catalog. 1:x means 1 part concentrate to x parts water. For example, to make a quart of solution in a 1:15 dilution, mix 2 oz. of concentrate into 30 oz. of water. (NOTE: To minimize foaming, fill the container with water before adding the concentrate. Then stir thoroughly.)

CONVERSION CHART

1 Gallon =	128 ounces	¼ Cup =	2 ounces
1 Quart =	32 ounces	½ Cup =	1 ounce
1 Pint =	16 ounces	2 Cup =	1 Pint
1 Cup =	8 ounces	2 Pints =	1 Quart
½ Cup =	4 ounces	4 Quarts =	1 Gallon

24-oz. Spray Bottle

Quart
